ABOUT ME

I am a hard-working person that likes a job well done but also moments of relax in the daily life. I think I can adapt to multiple situations and experiences both in personal and work life. A great challenge in this aspect has been the Erasmus program in Bucharest in which I have participated.

Among the things I like doing on my free time I would remark flying, travelling everywhere I can and running.

I like working in projects that combine engineering with workshop work and to feel the result of the work. I am not afraid of getting my hands dirty.
