IRR - Inclusive Responsible Research. Knowledge Mobilisation and University Social Responsibility (2020-2022)

Financial Agreement no. 2020-1-ES01-KA203-081978

The IRR Project is a two-year project that began in September 2020, funded by the European Audiovisual and Culture Executive Agency within ERASMUS + program.

IRR aims to facilitate the change towards a more inclusive responsible research, building, in this way, more inclusive higher education systems, promoting the civic and social responsibility of students, researchers and universities.

The specific objectives of IRR are as follows:

1. Promote the inclusion through Knowledge Mobilization (KM) strategies targeting the research groups within partner universities;
2. Review inclusive responsible research best practices found at international level;
3. Establish guidelines for a more Inclusive Responsible Research.

The project will develop, in a clear and systematic way, a series of reports, based on a range of indicators, to show the level of inclusive practices within university research. It will provide a clear picture of the functioning of research groups, underlining the social impact of their results (**O1**), and it will provide an online guide for enhancing an inclusive approach within research processes and results (**O2**).

O1 - Knowledge Mobilisation Report will consist in the development of a series of reports describing the current situation within partner universities related to KM. Specifically, the following reports will be made within O1:

- ▶ 30 (minimum) research group profile reports per university;
- ▶ 5 university reports presenting the current state of the institution related to KM in the partner universities. Specific information will also be included on some of the MoRRI indicators (EC. 2018) for these institutions (specifically, those related to Equality Gender: GE1 and GE8; Open Access: OA1; OA3 and Ethics: E1a);
- ▶ 1 overall institutional report for each of the 5 partner institutions that will be disseminated to all universities in the partner countries, both public and private (128 in Spain, 32 in Austria, 106 in Romania, 19 in Serbia and 7 in Slovenia) as well as to the institutions in other countries that have shown their interest on the project activities and its outcomes.

Within **O2 - Online Guide "Towards an Inclusive Responsible Research"** a series of guidelines will be developed aimed to facilitate the beginning of a transformation towards a promotion of quality focused not only on the scientific-technical impact but also on the social impact. IRR will also provide researchers with a useful online tool to help them to develop more inclusive research actions.

The IRR Consortium integrates five partners with relevant expertise in university social responsibility, responsible research and innovation and community engagement:

Universitat Jaume I de Castellon (ES) - coordinator,
3S Research Laboratory – Forschungsverein (AT),
University Politehnica of Bucharest (RO),
Univerzitet U Kragujevcu (SR),
Ljudska Univerza Ptuj (SL).
